Objectives

Upon completion of this program, the learner will be able to:

- Describe the role of the home care nurse in relation to the technology-assisted child in transition from hospital to home.
- Develop a comprehensive treatment plan and establish realistic, measurable goals.
- List six members of a multi-disciplinary discharge/care management team and describe the role of each person.
- Discuss the need for and how to maintain a professional relationship with family members involved in the care of the child, as well as with the child.
- Describe two challenges faced by parents/caregivers and siblings of technology assisted children and delineate appropriate interventions to support the family with these challenges.
- Outline emergency preparedness steps to carry out in home and community when an emergency arises for the technology-assisted child.
- Describe how to prepare for traveling outside the home.
- Demonstrate proper documentation of the care provided to a technology-assisted child.
